

The Evolution of Madagascar

60' in HD

For an enthusiastic young ecologist, Madagascar is a land of wonders. But when his search for the world's largest lemur, the *Indri Indri*, leads him to discover just how close to extinction such species are, he searches for reassurance that all is not lost.

Traveling the country, he gets to know the wildlife and the people of Madagascar, seeing first hand the harsh reality of the evolutionary fight for survival. Along the way, we learn of the origins of life on this island, and what so threatens its future.
